

Pro-Flex Ultimate

High Performance Elastomeric Wall Coating

Andura Pro-Flex technology has, for over a decade, provided excellent long term protection and decoration for buildings. The elastomeric properties of Pro-Flex technology give excellent resistance to subsequent cracks in the substrate. Andura have now developed a 'new improved' product using the very latest advances in coatings technology. Pro-Flex Ultimate has been specially formulated to combine all the benefits of Pro-Flex technology with improved breathability, water, and dirt resistance to give a harder wearing, longer lasting and beautiful finish, helping your walls stay in top condition.

The Benefits of Pro-Flex Ultimate

- **Improved Breathability** – Classified as 'Highly Breathable' when tested in accordance with DIN EN ISO 7783 Part 2.
- **Improved Water resistance** – Classified as 'Highly Water resistant' when tested in accordance with DIN EN 1062-3
- **Excellent Dirt resistance** – The addition of silicone resin and silane to Pro-flex considerably improves resistance to dirt pickup.
- **Elastomeric and Crack Accommodating Protection**

Laboratory tests carried out by CHT Bezema Test Facilities, operating in accordance with, and approved by, DAKKS and ISO 9001.

Advantages

- Elastomeric and highly crack resistant
- Excellent breathability
- Superior durability
- Highly dirt resistant
- Combining excellent performance with environmentally friendly water based formula

Pro-Flex Technology Case Study

Regency House, Royal Leamington Spa

Andura Pro-Flex technology provides a high performance, crack accommodating elastomeric pure acrylic protective and decorative coating.

"We are delighted with the finished result, Andura have been extremely helpful and totally professional in their approach from the commencement of this project."

Peter James, the Chairman of the Residents' Association.

"It's been a real pleasure to work with Andura on the project. We would certainly value the opportunity to work with them again on future commercial projects."

Amy Palmer, Faithful & Gould
